ABOUT

Momentum Engineering, Inc. delivers innovative software solutions and data-driven engineering methodologies. We leverage DevOps/DevSecOps principles and cloud-based automation to characterize and reliably measure applications and systems. We work as trusted partners to our customers to develop, integrate, test and maintain data-centric solutions.

PAST PERFORMANCE

Current Experience

- CI/CD leveraging DevOps and DevSecOps
- Database Engineering (SQL/noSQL)
- Data Engineering Frameworks (Splunk, ELK)
- Full Stack Development
- Integration with tracking/automation frameworks (Atlassian Suite)
- SCRUM Development
- Security Compliance & Systems Accreditation
- Serverless Computing & Streaming
- UI/UX Development (Node, Angular)

Contract Vehicles

- GSA MAS
- SEAPORT NxG

CORE COMPETENCIES

System Engineering & Architecture

- Enterprise Architecture & Systems Design
- Cloud Computing & Virtualization
- SaFE & Agile Development Practices
- Automation & Orchestration Tools
- DevOps/DevSecOps Integration

Software & Analytical Engineering

- Software Development
- Analytic Design & Implementation
- Machine Learning
- Reverse Engineering & Malware Analysis
- Data Conditioning & Extract/Transform/Load
- Data Tagging & Compliance

Full Lifecycle Test & Evaluation

- Test Planning, Execution, & Reporting
- Focused Test Areas

DIFFERENTIATORS

- Woman Owned Small Business
- Top Secret (TS) Facility Clearance Level (FCL)
- 97% Employees w/ DoD TS Clearance w/FS
- >70% Employees w/ Professional Certifications
- 100% Retention Rate
- 10+ Years of Experience Supporting DoD& IC Customers
